- 24/7 Worldwide Fixed-Wing Air Ambulance
- Complete Bed-to-Bed transport management
- Certified Fixed-Wing Air Ambulance Aircraft configured for ICU-level care

When Time Matters and Decisions Feel Heavy

When a patient requires a fixed-wing air ambulance, the situation is rarely simple.

- ★ There is urgency.
- ★ There is uncertainty.
- ★ And decisions must be made correctly.

We provide structured oversight and clear coordination so you can move forward with confidence.

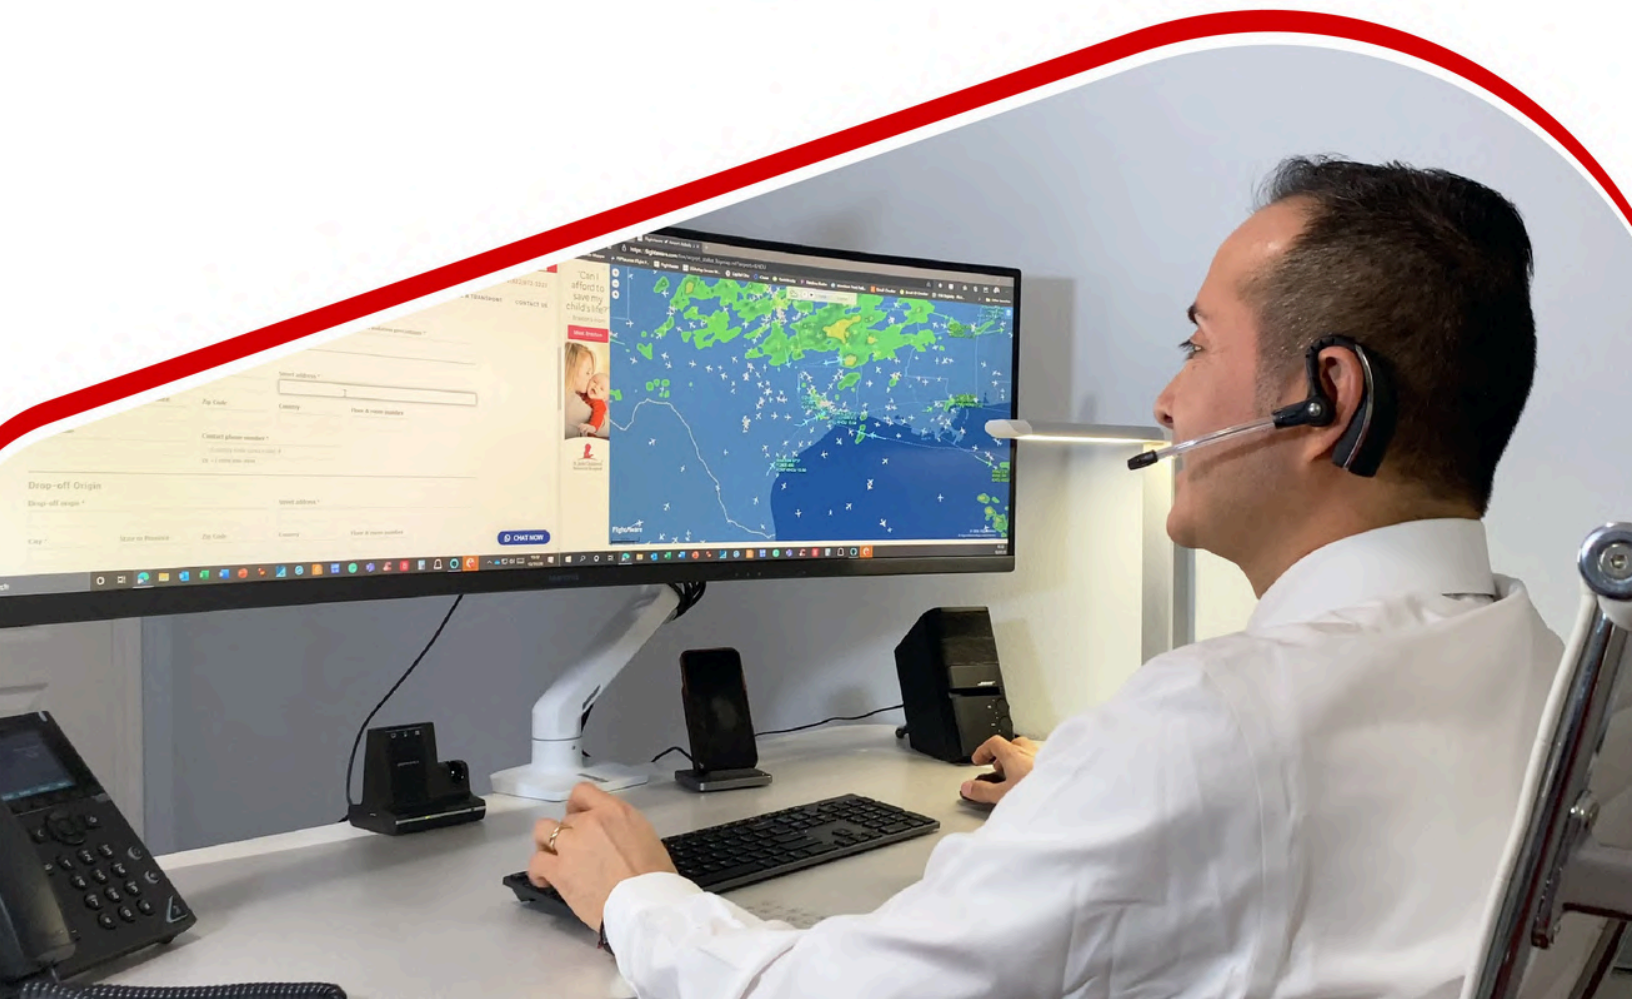

You are not expected to manage this alone.

What We Do

We provide complete bed-to-bed fixed-wing air ambulance transport management.

- ★ U.S. domestic transports
- ★ Transports from and to the United States
- ★ Worldwide international transfers

We manage, direct, oversee, and coordinate the entire transport from first contact through arrival.

When Fixed-Wing Air Ambulance Is the Right Choice

- ★ Patient condition may deteriorate during transport
- ★ Continuous medical monitoring required
- ★ Patient requires isolation or infection control
- ★ Immunocompromised patients, including oncology or transplant care
- ★ Palliative or hospice care requiring monitored transport
- ★ Commercial travel is unsafe or not appropriate
- ★ Ground transport is impractical or unsafe
- ★ Long-distance or international transfer required
- ★ Distance typically exceeds 300 miles

Each case is evaluated individually.

Air Medical Transport

is a Transportation Management Organization (TMO).

Our Flight Coordinator Specialists manage, direct, oversee, and coordinate every mission through our global alliance network of selected FAA Part 135 and EASA-certified fixed-wing air ambulance operators.

Our team brings direct experience in U.S. domestic and international air ambulance coordination, and ICU-level care for critically ill patients during transport.

Every transport is managed with clinical discipline, attention to detail, and respect for the patient, family, and medical teams involved.

Our focus is to keep the process clear, coordinated, and properly aligned from start to finish.

How We Manage Each Transport

A Clear, Structured Process

1. Request a Quote

Provide general details. We present appropriate options.

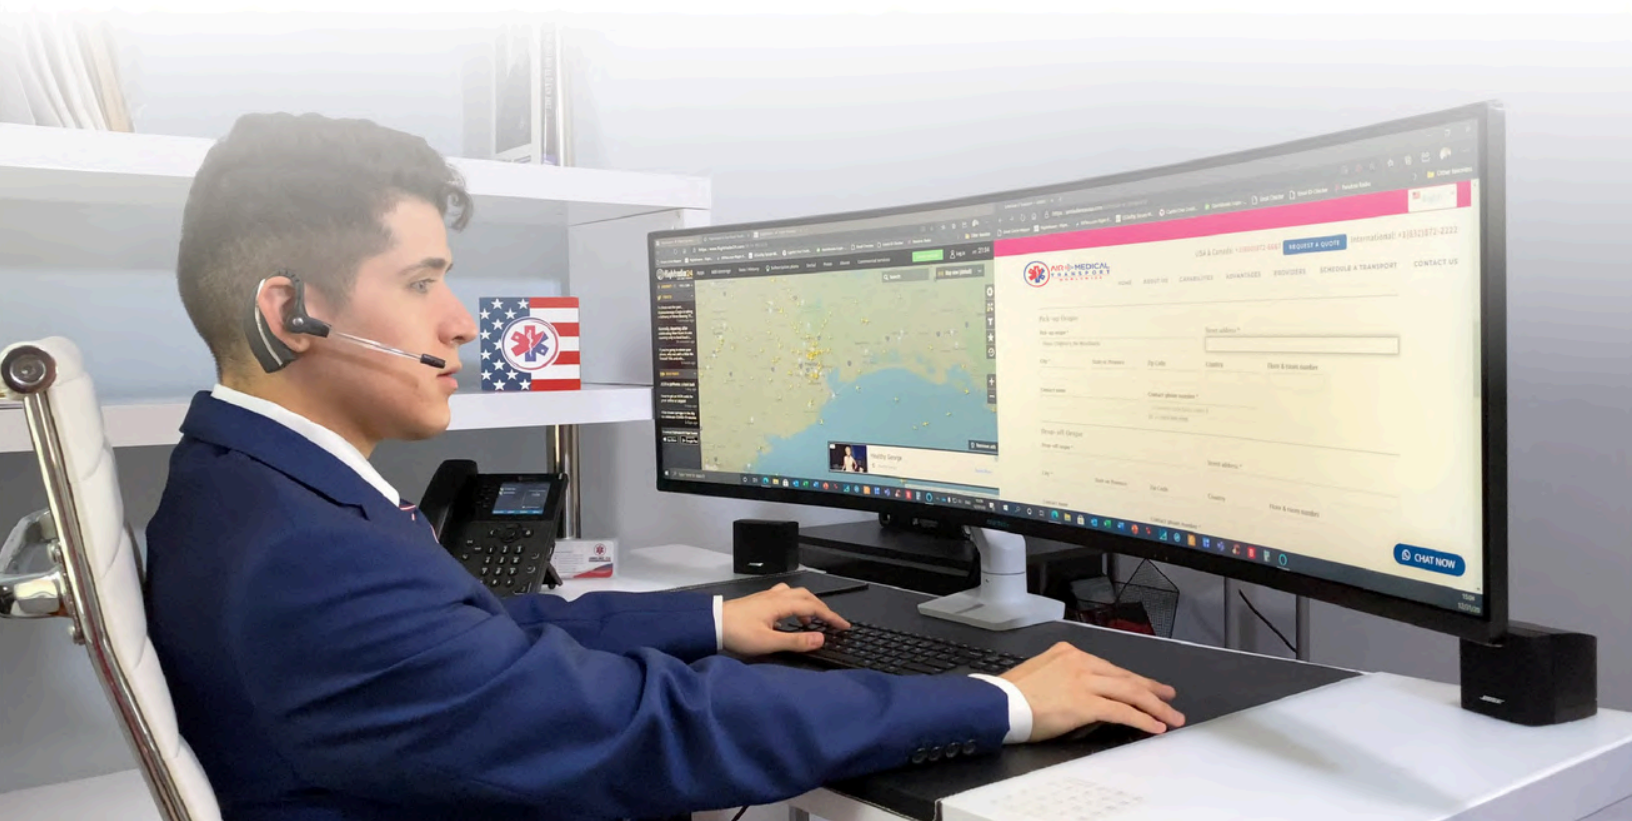

2. Agree and Pay for Transport

- Payment activates aircraft allocation and planning.
- Scheduling is confirmed after required documentation, including booking form, medical report, and identification, is received and verified.

3. Booking and Coordination

We arrange and manage the full transport and itinerary through completion.

You receive clear, structured updates from departure through arrival.

Global Coverage

- ★ Within the United States
- ★ From and to the United States
- ★ Between international locations worldwide,
excluding domestic transfers outside the United States

Aligned to the closest suitable airport for safe and efficient transfer.
